📇 Profile

A programmer that **loves to ship quality products** and have a diverse set of skills ranging from frontend to backend with **PHP and MERN stack**. I also love **helping, contributing, and solving problems** in the communities like **Stackoverflow**, Discord etc.

💼 Professional Experience

Web Developer, Tagnpin Web Solutions ⧉   Jul 2021 – Jul 2022
- Working on the frontend with **ReactJS, CSS, and JavaScript,** to create complex user interfaces
- Working with the backend team using **PHP** to **create/redesign APIs**
- Connecting with the marketing team to **communicate/handle clients** across the world
- Creating campaigns for the clients to **analyze their audience**
- Praised for writing **clean, modularized code** and creating solutions for the complex problems

Frontend developer (intern), Heiphen ⧉   Apr 2021 – Jul 2021
- Developing designs for the official website
- Working with a team to create **user interface** solutions
- Worked on improving the UX of the product
- Used **development tools like React, Bootstrap, and GitHub** to collaborate with the team members

📁 Projects

Natours ⧉   2022
GitHub Link: **https://github.com/ArunBohra12/natours**
About: A tour booking web app created with **MERN stack.**

Key Features:
- Creating resources like tours **(available for admins)**
- **Login and signup with JWTs** and use **Nodemailer and SendGrid to send emails**
- Allow users to **book and review tours**
- User profiles - Update username, photo, email, and password
- Using **MongoDB** for storing user information in the database using **schemas and models** created using **Mongoose**
- Having users pay for booking tours with the help of **Stripe payments gateway**

Talk-A-Tive ⧉   2022
GitHub Link: **https://github.com/ArunBohra12/talk-a-tive**
About: Messaging application with **unlimited group creation, 1-1 chats, and user authentication**

Key Features:
- **Real-time messaging**, **typing notifier** powered by **Socket.IO**
- **Admin features** available for **managing groups,** need to be verified as an admin to **remove users from the group**
- Providing real-time **activity notifications** and creating the **UI** using the **Chakra UI** library
- Using **CI/CD** with the Railway platform to deploy the application.
